

BIOMEDICAL ENGINEERING SOCIETY

Year in Review
2024 - 2025

About BMES

Description

The Biomedical Engineering Society (BMES) at Toronto Metropolitan University is a dynamic, student-led organization committed to fostering academic excellence, professional development, and community impact. With a team of over 40 active members, BMES TMU offers a wide range of initiatives focused on wellness, career growth, mentorship, and technical innovation. We strive to serve and engage the biomedical engineering student body through inclusive programming and impactful events.

Mission Statement

Our mission is to support and empower biomedical engineering students at TMU by promoting community, career development, and wellness. We aim to provide accessible opportunities for skill-building, networking, mentorship, and leadership through innovative programming that reflects the needs and values of our student body. We believe in fostering inclusive and collaborative spaces for all members, bridging the gap between academia and industry, prioritizing mental health and holistic student well-being, and encouraging technical exploration and creative problem-solving.

Notable Achievements

BMES Conference 2025: “Engineering the Future of Health”

Hosted a full-day flagship event with 100+ students, keynote speakers, hands-on workshops, and a case competition → *Link to Learning Outcomes:*
https://docs.google.com/spreadsheets/d/1TnpliRs7SkXZ8RUuDtexhp42eyqrMafObfm_1YF2Ogs/edit?gid=0#gid=0&range=C4

Rest & Reset Wellness Event

Delivered care packages and hosted de-stressor activities for 100+ students before finals → *Link to Learning Outcomes:*
https://docs.google.com/spreadsheets/d/1TnpliRs7SkXZ8RUuDtexhp42eyqrMafObfm_1YF2Ogs/edit?gid=0#gid=0&range=C8

Alumni Night & Resume Roast

Connected 75+ students with alumni and professionals from top companies for networking and resume feedback → *Link to Learning Outcomes:*
https://docs.google.com/spreadsheets/d/1TnpliRs7SkXZ8RUuDtexhp42eyqrMafObfm_1YF2Ogs/edit?gid=0#gid=0&range=B5

BMES Chapter Membership Renewal

Renewed our membership with the Biomedical Engineering Society with 10+ active memberships, gaining access to several academic, professional and mentorship resources → *Link to Learning Outcomes:*

Learning Outcomes

Achievement	Learning Outcomes for Organizer	Learning Outcomes for Participants
BMES Conference 2025	-Helps organizers coordinate team contributions effectively to put diverse skill-sets to use in event planning. - Facilitates ability to reach out and negotiate with external vendors. - Facilitates organizer ability to design complex problem statements using knowledge of real-world or industry issues. - Teaches organizers how to respond to sudden changes in event schedules.	-Improves participants comprehension of challenge content. - Improves participant's soft and hard skills during competition - Promotes participants' community collaboration - Pushes participants to make informed decisions to solve problems - Allows for networking with peers.
Rest & Reset Wellness Event	- Allows for student engagement with peers. - Helps develop student organizer's ability to empathize and develop deeper understanding of others' perspectives. - Helps organizers mentor and assist one another by sharing personal experiences. - Facilitates ability to reach out and negotiate with external organizations.	- Allows for student engagement with peers. - Promotes participants' community collaboration - Helps participants mentor and assist one another by sharing personal experiences.
Alumni Night & Resume Roast	- Facilitates ability to reach out and negotiate with external vendors. - Improves student ability to plan out complex networking events. - Pushes student organizers to make informed financial decisions in order to use funds effectively. - Improves verbal and non-verbal communication skills needed to run such an event. - Teaches organizers how to respond to sudden changes in event schedules.	- Allows for networking with peers. - Encourages collaboration between student leaders. - Provides students with valuable industry-valued skills. - Improves public speaking ability. - Increases student organizer knowledge of post-graduate opportunities.

Community Connections

The Biomedical Engineering Society (BMES) actively fosters relationships both within Toronto Metropolitan University and with external partners. Internally, we collaborate with university departments such as the Department of Biomedical Engineering and the Career & Co-op Centre, as well as student groups to organize academic workshops, mentorship initiatives, and joint social or technical events. We also work closely with multiple student groups to strengthen student spirit and engagement, co-hosting activities such as the Halloween Trick-or-Treat event and the Movember Pub Night in partnership with ChemU and MUES. For most of our events, we partnered with Fat Bastard Burrito, offering food sponsorship that enhanced event turnout and engagement.

Externally, BMES partnered with a certified CPR training organization to provide students with affordable and accessible CPR certification—supporting student preparedness for clinical and workplace settings. We also hosted industry professionals and guest speakers from companies such as Boston Scientific, Myant, and MOLLI Surgical, offering students valuable insights into career paths in R&D, software, and medical device innovation. Additionally, our fundraising initiatives, such as selling custom patches, directly supported the Canadian Disability Resources Society, contributing to community-focused impact beyond our campus.

These efforts reflect our commitment to professional development, cross-disciplinary collaboration, and meaningful community outreach.

Next Steps

As we transition leadership, our immediate next steps focus on building continuity while advancing new initiatives. The incoming team will prioritize strengthening partnerships with student groups and external organizations to deliver impactful events, including expanding our signature Alumni Night and BMES Conference. A key deficiency identified is the underutilization of structured mentorship programs; the next team will work toward launching formal mentorship pairings between students, alumni, graduate students, and faculty to enhance academic and professional guidance. We will also continue to expand our technical and professional development offerings through more hands-on workshops, design team collaborations, and lab tours. Additionally, the next team will continue fostering student wellness and inclusivity by growing partnerships with equity-focused groups and advocating for accessible mental health resources through de-stressor events and wellness fairs.

Long Term Goals

Over the next two years, BMES TMU aims to evolve into a leading student hub for biomedical innovation, mentorship, and industry engagement. We plan to pursue recognition as an official participant at the National BMES Meetings, including seeking department and university funding to support international chapter travel and collaboration. We also recognize the need for deeper industry engagement; the team will work to cultivate sustained relationships with biomedical companies to support case competitions, speaker panels, and project sponsorships. Lastly as an additional long-term objective is to formalize new sub-teams or focus groups within BMES TMU, including a Mentorship & Networking Committee and an Industry Partnerships Committee to ensure targeted efforts in these areas.

Executive Team Roster

Role	Full Name	Discipline	Year of Study
President	Afrah Khan	BME	2nd year
Vice President	Serena Udayakumar	BME	3rd year
Vp of Marketing	Sachit Thakur	COMP ENG	2nd year
Vp of Finance	Zehra Hussain	BME	3rd year
Vp of Events	Mark Yacoub and Ryson Yau	BME	2nd year
Vp of Operations	Joshua Lyttle	BME	Co-op term
