Name	Email	Position
Afrah Khan	afrah.khan@torontomu.ca	Advisor (Outgoing President)

The background image for the report cover is a photograph of a modern, multi-story glass-walled building, likely a university or research facility. The building has a grid-like structure of windows and is surrounded by some trees and landscaping. The text 'CHAPTER DEVELOPMENT REPORT' is overlaid in large, bold, white letters with a blue outline. Below it, '2024-2025' is written in a smaller, white, sans-serif font. A large, dark red, stylized arrow points upwards from the bottom right corner of the image.

CHAPTER DEVELOPMENT REPORT

2024-2025

Faculty Advisor: Dr. Naimul Khan | Email: n77khan@torontomu.ca

It has been a transformative and exciting year for the Biomedical Engineering Society (BMES) at Toronto Metropolitan University. In 2024–25, we re-established our BMES national membership after an inactive period, strengthening our connection to the broader biomedical engineering community. Our team grew to approximately 40 dedicated members, with 12–15 holding official BMES memberships. This year, BMES TMU focused on expanding our chapter's impact through diverse programming that supported student wellness, professional development, mentorship, and technical innovation. From hosting student-alumni mixers to faculty-engaged conferences, we consistently prioritized opportunities that foster growth, collaboration, and engagement. Our chapter's presence and outreach also grew through our Instagram platform (@bmes.tmu) which currently stands at approximately a 1000 followers. This helped us share initiatives, events, and community highlights with a broader audience. BMES at TMU continues to draw passionate students from across the Faculty of Engineering and Architectural Science and remains committed to serving the biomedical engineering student body with enriching, inclusive programming. With renewed structure, stronger visibility, and a highly motivated leadership team, we are confident in our direction moving forward and excited for the continued development of our chapter in the years to come.

April 14, 2025

Dear Colleagues,

As the Faculty Advisor of the Biomedical Engineering Society (BMES) - TMU Chapter, I am honored to share the tremendous progress and impact our student-led organization has made in uplifting the biomedical engineering community at Toronto Metropolitan University. This past academic year has been a remarkable journey of growth, innovation, and community engagement. The chapter has consistently delivered on its promise with strong leadership and inclusive programming.

The 2024–2025 academic year marked the launch of multiple new initiatives aimed at student development. The chapter began the year with welcoming community events and moved forward with a lineup of professional development opportunities, including alumni networking nights, care packages for student wellness, and a fun-filled gingerbread house competition. They invited the CEO of a Toronto-based startup to inspire entrepreneurial thinking, hosted a CPR certification workshop to enhance student skill sets, and held a signature conference that featured a keynote speaker from the University of Waterloo and a hands-on workshop led by a professor from the University of Toronto. Additionally, they collaborated with the co-founders of Glucosense—an inspiring startup born at TMU—and successfully executed an Industry Night, bringing students face-to-face with representatives from major biomedical companies.

Looking ahead, the chapter aims to expand its membership base and increase student participation through enhanced skill-building workshops, graduate mentorship programs, and research lab tours. These goals align strongly with the chapter's mission to empower students at all stages of their academic and professional journeys.

It has been a privilege to work with such a dynamic, thoughtful, and driven group of individuals. I wholeheartedly endorse this Chapter Development Report and support their continued efforts to elevate biomedical engineering at TMU and beyond.

Regards

Naimul Khan

Faculty Advisor, BMES TMU Chapter

Associate Professor, Associate Chair of Graduate Studies

Dept. of Electrical, Computer & Biomedical Engineering / Master of Digital Media

Toronto Metropolitan University (formerly Ryerson University)

ADMINISTRATIVE REPORT

The Biomedical Engineering Society (BMES) – TMU Chapter continues to operate as a dynamic, student-led organization committed to academic excellence, professional development, and community impact within the biomedical engineering community. During the 2024–2025 academic year, the chapter prioritized student engagement through a diverse range of technical, professional, wellness, and outreach initiatives, all while strengthening internal operations and leadership structure. This report outlines our chapter's internal organization, leadership roles, membership breakdown, and timeline of meetings held throughout the academic year.

Our executive team worked diligently to ensure that all events aligned with our mission of fostering career growth, skill-building, and meaningful connections for undergraduate students. The year was marked by impactful milestones, including hosting TMU alumni, CPR workshops, a major conference featuring professors from the University of Waterloo and University of Toronto, and hands-on project-based opportunities. With clear leadership roles, active general membership, and strong planning through executive and general body meetings, BMES TMU has made significant strides in representing and serving the biomedical engineering community at our university.

BMES TMU - Management Overview

EXECUTIVE MEMBERS & THEIR RESPONSIBILITIES

Position	Name	Responsibilities
President	Afra Khan	Oversees all chapter operations, strategy, external communication, and partnerships
Vice President	Serena Udayakumar	Supports the President, assists with strategic planning, and ensures team cohesion
VP Finance	Zehra Hussain	Handles budgeting, revenue, and reimbursements for the entire team
VP Marketing	Sachit Thakur	Designs and manages branding, social media, newsletters, and marketing campaigns
VP Communications	Ronit Royan	Responsible for all internal and external communication to partners and community
VP Operations	Joshua Lytle	Manages logistics and external contacts, leads and coordinates the case competition
VP Events	1. Mark Yacoub 2. Ryson Yau	Plans and coordinates events, space bookings & reservations, catering and event logistics

MEMBERSHIP DATA

Total Student Members: 40

National BMES Members: 12 (**30%**)

General Event Attendance: ~100

Departments Represented: ECBE (Department of Electrical, Computer and Biomedical Engineering)

As part of our future plans, the chapter aims to increase both graduate membership and National BMES Membership in the upcoming years

Chapter Membership Classification

National BMES Memberships

Note: Membership is open to all TMU students, particularly those studying biomedical engineering, with growing interest from related engineering fields.

BMES TMU MEETINGS

GENERAL AND EXECUTIVE

Meeting Type	Date	Agenda Highlights
Executive #1	Aug 30, 2024	Welcome Onboard! Goals and Responsibilities for the year 2024-25
Executive #2	Sep 13, 2024	Fall Kick-off and Planning
Executive #3	Sep 20, 2024	Memberships, Directors Hiring & Board Games + Trivia Night
General #1	Oct 6, 2024	BMES General Meeting and Directors Welcome
Executive #4	Oct 11, 2024	Alumni Night Planning
Executive #5	Oct 18, 2024	Alumni Night & Halloween Trick or Treat Event Collaboration
Executive #6	Oct 25, 2024	Alumni Night & Resume Roast Last-Minute Changes
Executive #7	Nov 15, 2024	November Updates & Plans
General #2	Nov 19, 2024	BMES General Meeting and November Updates
Executive #8	Nov 22, 2024	Rest & Reset Planning, Semester-End Wrap-Up
General #3	Jan 18, 2025	BMES General Meeting and Winter Semester Planning
Executive #9	Jan 24, 2025	Winter Semester Event Planning
Executive #10	Feb 7, 2025	BMES Conference: "Engineering the Future of Health" Planning
Executive #11	Feb 28, 2025	BMES Conference: Final Updates and Touchdown
General #4	Mar 12, 2025	Semester-End Updates and Last-Minute Conference Planning

Note: In addition to these official executive and general body meetings, subcommittee meetings took place weekly to ensure ongoing progress in each portfolio.

TREASURY REPORT

The Biomedical Engineering Society (BMES) at Toronto Metropolitan University managed its finances responsibly throughout the 2024–2025 academic year. All operational funds were provided by the university, and no internal fundraising was conducted for organizational use. Fundraising activities organized by the chapter were exclusively for charitable causes. The year began with a rollover balance of \$9,700. Funding priorities focused on professional development, technical workshops, wellness initiatives, and community-building events for students. Our largest investment was in the successful execution of the BMES Conference, “Engineering the Future of Health,” which served as the flagship event of the year. The biggest highlight of our finances this year involved having a **Sponsorship** from the ***SAMP Hospitality Catering Services***. The financial planning and allocations reflected BMES TMU’s ongoing commitment to delivering high-quality programming that supports the academic, professional, and personal growth of our members.

BMES TMU 2024–2025 Expense Breakdown

EXPENSES BREAKDOWN

Total Expenses: \$11,200.00 (Used & Reimbursed)

Opening Balance: \$9,700.00

Funds Provided by TMU (2024–2025): \$4961.26

Closing Balance: \$3461.26

Note: Expenses are in CAD

Event/Category	Details	Amount
Meet & Greet	Food, marketing materials	\$300.00
Alumni Night	Catering, alumni gifts, decor	\$2,000.00
Site Visit/Lab Tour	Transportation	\$500.00
BMES Membership Fees	Memberships for students and faculty advisor	\$800.00
Exam Care Packages	Care packages	\$500.00
Office Supplies	Stationery, utensils	\$300.00
Team Appreciation Dinner	Dinner for core team	\$600.00
CPR Workshop	Refreshments	\$200.00
BMES Conference	Catering, AV, workshop materials, merch, gifts	\$5,500.00
Wellness Day (Care Packages & Soup Station)	Food, wellness supplies	\$500.00
Total Expenses		\$11,200.00

Note: Expenses are in CAD

CHAPTER ACTIVITIES

Throughout the year, BMES TMU has organized a variety of activities focused on fostering community engagement, professional development, and collaboration with external organizations. Our events have ranged from networking opportunities with industry professionals to interactive social activities aimed at building connections among students. Notable highlights include the BMES Conference 2025, which featured industry professionals and entrepreneurial students, and the "Rest & Reset" event, which provided stress relief for students before final exams. These activities were complemented by our community outreach and fundraising efforts to support local organizations and promote awareness about important causes.

Rest and Reset, 2024

SOCIAL OR OTHER ACTIVITIES

Our social activities were designed to encourage fun, bonding, and engagement among members. These events allowed students to relax, network, and build friendships. These events helped to build camaraderie among members while offering an outlet for stress relief during the academic year, our social events were a hit, offering both entertainment and opportunities for members to come together in a relaxed atmosphere.

Board Games & Trivia Night | Sept 27, 2024

We kicked off the fall semester with a fun night of board games and trivia. Trivia winners received prizes. This event was aimed at fostering a sense of community and offering a fun break from studies.

Cost: \$350 (Cost of Food and Prizes)

Attendance: 60 students

Goal: Build relationships and engage members in a relaxed, non-academic setting.

Outcome: Positive feedback and increased engagement.

Rest & Reset Community De-stressor | Nov 28, 2024

One of our most popular events, it featured an in-house gingerbread house competition, 100 care packages for attendees, and activities like bracelet making and origami. The event concluded with a photobooth and a social media contest for the best gingerbread house.

Cost: \$750 (Event expenses for supplies and care packages)

Attendance: 100+ students

Goal: Offer a mental health break before finals.

Outcome: High attendance and positive engagement on social media.

BMES Conference Team Sweet Treat | Mar 16, 2024

After the conference, we took our team out for ice cream to celebrate the event's success and foster team bonding.

Cost: \$35

Attendance: 20 students

Goal: Celebrate the hard work put into organizing the conference.

Outcome: Strengthened team spirit and camaraderie.

SOCIAL OR OTHER ACTIVITIES

Board Games & Trivia Night, 2024

Rest & Reset De-stressor, 2024

Post-Conference Sweet Treat, 2025

INTER-CHAPTER ACTIVITIES

Due to the limited number of BMES student chapters within Canada, we were unable to conduct any formal inter-chapter activities this year. Despite this challenge, we made efforts to connect with other BMES chapters through social media platforms, particularly Instagram, to begin establishing relationships. These initial interactions have opened the door for potential collaborations, and we are currently exploring virtual and online opportunities to engage students across chapters in the future. Our goal is to facilitate accessible and meaningful inter-chapter events that strengthen the broader BMES student community, regardless of geographical limitations.

OUTREACH ACTIVITIES

BMES TMU focused on outreach initiatives aimed at engaging with the broader community, raising awareness, and contributing to charitable causes. Our events connected students to local organizations, supported public awareness campaigns, and made a tangible impact through fundraising. From tabling at large-scale events to running charity fundraisers, we ensured students were both informed and involved. These initiatives created meaningful touchpoints between BMES and the wider TMU student body, while also reinforcing our commitment to community impact. Each event was designed with inclusivity and student engagement in mind, allowing us to foster stronger connections with first-year students, prospective applicants, and external organizations. In addition to increasing our visibility, our outreach helped showcase the value of biomedical engineering in everyday contexts and promoted BMES as a welcoming space for all students interested in innovation, healthcare, and technology.

Tabling at The Frosh Engineering Expo | Aug 26, 2024

Aimed at welcoming first-year engineering students, we hosted a Jeopardy game with prizes to engage new students and introduce them to BMES.

Cost: \$50 (Prizes)

Attendance: 1000+ first-year students

Goal: Raise awareness about BMES and recruit new members.

Outcome: Increased membership sign-ups and student engagement.

Trick or Treat Tabling | Oct 31, 2024

In collaboration with over 25 student groups, we handed out candy in exchange for introducing students to BMES.

Cost: \$50 (Event expenses for treats and materials)

Attendance: 200 students

Goal: Raise awareness about BMES within the engineering faculty.

Outcome: Increased visibility and interest in BMES.

OUTREACH ACTIVITIES

Movember Pub & Karaoke Night | Mar 16, 2025

In collaboration with two other student groups, BMES hosted a Movember-themed Pub & Karaoke Night in support of Men's Health Awareness Month. The event aimed to raise awareness around men's mental and physical health while fostering a supportive and relaxed social environment. With karaoke, interactive games, and a prizes, students were encouraged to participate and engage with the cause. All donations collected were matched, effectively doubling the total amount raised for men's health initiatives.

Cost: \$300 (Event expenses for venue and prizes)

Attendance: 80+ students

Goal & Outcome: Raise awareness for men's mental and physical health while fostering community engagement. Outcome: Increased student participation in charitable causes and over \$300 raised for Movember Foundation through matched donations.

BMES Conference Fundraiser | Mar 16, 2025

We sold BMES patches to raise funds for the Canadian Disability Resources Society. The sale of more than 50 patches raised awareness for disability resources.

Cost: \$180 (Cost of Custom Patches)

Attendance: 50 patches sold

Goal: Raise funds for charity and engage members in giving back to the community.
Outcome: All profits donated to the Canadian Disability Resources Society.

TMU Open House Tabling | Mar 29, 2025

We spoke with prospective students and their families about the opportunities available in BMES and answered questions about the program and team activities.

Cost: \$20

Attendance: 200+ prospective students and families

Goal: Raise awareness of BMES and attract new members.

Outcome: Positive reception and interest in joining BMES.

MENTORING ACTIVITIES

This year, BMES at TMU began laying the groundwork for a sustainable and impactful mentoring program to support the academic and professional development of our student members. In an effort to connect undergraduate students with experienced mentors, we successfully recruited a graduate student member with the intention of launching a graduate mentorship initiative. Additionally, we have been in ongoing conversations with the university's Career & Co-op Centre, Student Success Centre, and the Graduate Faculty of Engineering to explore collaborative mentorship opportunities. While formal mentoring events have not yet been launched, these efforts mark the foundation for future programming aimed at providing guidance, career insights, and skill development for our members. Our chapter remains committed to creating meaningful connections and resources to support student growth in the coming year.

INDUSTRY OR PROFESSIONAL ACTIVITIES

BMES at TMU emphasized professional development throughout the year by hosting events that allowed students to connect with industry professionals, learn about career paths, and gain insight into emerging trends in biomedical engineering. Through panels, workshops, and networking events, students had the opportunity to engage directly with professionals from various sectors including medical devices, health-tech startups, and academia. Our goal was to equip students with the knowledge and confidence to navigate the evolving landscape of biomedical engineering. We also collaborated with faculty and career services to provide tailored programming that complemented students' academic learning. These efforts helped bridge the gap between classroom knowledge and real-world applications, encouraging students to actively shape their career trajectories.

Alumni Night & Resume Roast | Oct 28, 2024

Alumni from companies such as Boston Scientific, Johnson & Johnson, Intel, Volterra, IPEX, Veolia, Kainos, Green Aspects, Dimachem, Chs, and Internal TMU Faculty shared their experiences, while professionals from TMU's Career, Co-op & Student Success Centre offered resume feedback.

Cost: \$800 (Catering and gifts)

Attendance: 75 students

Goal: Connect students with industry professionals and provide resume feedback.

Outcome: Enhanced networking opportunities and valuable career insights for students.

MetMeetMed Panel | Nov 21, 2024

Dr. Narjes Allahrabbi, CEO of Fertilead, shared her journey as an entrepreneur in the fertility care industry.

Cost: \$200 (Catering)

Attendance: 30 students

Goal: Provide industry insight into entrepreneurship and health-tech innovation.

Outcome: Inspired students and facilitated connections with an entrepreneur.

INDUSTRY OR PROFESSIONAL ACTIVITIES

BMES Conference 2025: Engineering the Future of Health | March 16, 2025

Attendance: 85 students

Cost: \$5,500 (Catering, workshops, materials, case competition prizes)

The Biomedical Engineering Society (BMES) hosted its annual flagship event, BMES Conference 2025, under the theme “Engineering the Future of Health.” With over 200 student attendees, the conference offered a full-day immersive experience centered on innovation, industry, and impact in biomedical engineering.

Our goal was to foster professional development, promote interdisciplinary collaboration, and introduce students to emerging trends and real-world applications in biomedical engineering. The conference saw remarkable student engagement through a blend of keynote sessions, interactive workshops, a case competition, and a dynamic industry networking panel.

 *Keynote Speaker: Dr. Liza-Anastasia DiCecco*

Dr. DiCecco, from the University of Waterloo, opened the conference with a powerful keynote titled “Engineering the Future of Hard Tissues: Biomaterials, Biomineralization, and Beyond.” Her talk provided deep insights into the current landscape of biomaterials research and the future of hard tissue engineering, inspiring students to explore advanced research paths.

 *Workshop 1: Embolic Biomaterials for Vascular Embolotherapy*

Led by Dr. Mohammad Moeini, Research Associate at the University of Toronto's Department of Materials Science and Engineering, this workshop dived into cutting-edge embolic biomaterials. Attendees learned about their applications in minimally invasive procedures, especially in treating vascular anomalies.

 *Workshop 2: Entrepreneurship in Wearable Tech – GlucoSense*

TMU student-founded startup GlucoSense hosted an engaging session focused on diabetes prevention through wearable technology. They shared their entrepreneurial journey—from concept to prototype—and offered students a chance to participate in a pitch competition, encouraging innovation and business thinking in BME students.

INDUSTRY OR PROFESSIONAL ACTIVITIES

Case Competition

Students competed in an in-house Prosthetics Case Competition, where they tackled real-world challenges related to prosthetic device design and implementation. The competition was judged by two TMU Teaching Assistants, who evaluated the solutions based on creativity, feasibility, and impact.

Industry Networking & Expert Panel

Our networking session and panel discussion featured professionals from leading organizations such as:

- Conavi Medical
- Ontario Genomics
- Dalla Lana School of Public Health (UofT)
- Arrayus Technologies Inc. / Amen Medical Quality Devices Inc.
- Alexion
- Shoppers Drug Mart
- SI Incorporated
- Philips

Panelists shared their career trajectories, insights on industry trends related to AI and Healthcare Data, and answered questions on how students can transition from university to impactful careers in biomedical engineering.

Conference **Outcome:**

BMES Conference 2025 successfully elevated student exposure to biomedical industry pathways and academic innovation. We saw a marked increase in student participation in discussions on industry trends, research, and entrepreneurship. The event created meaningful networking opportunities and sparked inspiration among the next generation of biomedical engineers.

INDUSTRY OR PROFESSIONAL ACTIVITIES

Alumni Night, 2024

Alumni Night, 2024

MetMeetMed, 2024

BMES TMU Conference, 2025

SOCIETAL IMPACT ACTIVITIES

BMES at TMU aimed to make a societal impact by hosting activities that contribute to the health and well-being of the community through education and hands-on workshops. We also supported charitable initiatives that provided practical benefits to those in need. By offering accessible skill-building opportunities, we empowered students to take an active role in community health. Our events emphasized both professional growth and social responsibility, aligning with BMES's mission to bridge engineering with real-world impact.

CPR C Certification Workshop | Feb 5, 2025

In partnership with SAJE Vital Signs, 30 students earned CPR C certification at a discounted rate.

Cost: \$35 per student (Discounted workshop price)

Attendance: 30 students

Goal: Equip students with life-saving skills.

Outcome: 30 students certified in CPR, enhancing their ability to contribute to community safety.

NATIONAL BMES MEETING

To date, BMES at Toronto Metropolitan University has not had the opportunity to attend the National BMES Annual Meeting. As a relatively new and growing chapter, our participation has been limited due to funding and logistical constraints, particularly with regard to international travel.

However, we recognize the immense value that the National Meeting offers in terms of professional development, research exposure, and networking with peers and industry leaders in biomedical engineering. Currently, our executive team is actively in discussions with the Department of Biomedical Engineering to secure funding and institutional support to enable our members to attend future Annual Meetings.

Our goal is to provide students with the opportunity to present research, engage in leadership development sessions, and bring back knowledge and connections that can further strengthen our chapter's presence and impact at TMU. Attending the National BMES Meeting would mark a significant milestone in our chapter's journey toward broader engagement with the global BME community.

FUTURE DIRECTION

As we reflect on this past year—a journey marked by growth, renewed purpose, and meaningful impact—we are filled with heartfelt gratitude. Serving as the President and Vice-President of the Biomedical Engineering Society at Toronto Metropolitan University has been both an honour and a deeply rewarding experience.

This year, our team came together with a shared vision to breathe new life into our chapter. Through dedication and collaboration, we not only strengthened our presence on campus but also took a major step forward by rejoining the National Biomedical Engineering Society after a period of inactivity. This reconnection signifies more than just a membership; it marks a new chapter of opportunity—one that aligns us with a vibrant network of biomedical engineering students and professionals across North America.

We are proud of the foundation we've helped rebuild—one rooted in community, innovation, and resilience—and we are confident that BMES at TMU is now poised to continue thriving in the years to come.

a. Goals Achieved This Year

This year, our team focused on three core pillars: *Community, Career Development, and Wellness*.

Community: We placed a strong emphasis on building a more visible, inclusive, and connected BMES community. Through consistent tabling across campus—at orientation events, student group fairs, and key program-specific gatherings—we amplified our presence and made BMES more accessible to students at every stage of their academic journey.

We actively sought out collaboration opportunities with other student groups and campus organizations, staying responsive and open to partnerships that reflected the evolving needs of our members. Most importantly, we listened—gathering feedback, understanding concerns, and responding with impactful initiatives.

Standout events like Alumni Night & Resume Roast and our Industry Networking Night provided students with invaluable opportunities to connect with professionals from diverse biomedical sectors. These events went beyond surface-level interaction, encouraging honest conversations about career paths, industry challenges, and post-graduation realities. They were built for our community and shaped by their voices.

FUTURE DIRECTION

Career Development: Supporting our members' professional growth has remained at the heart of our programming this year. We hosted a range of hands-on and skill-focused workshops—including CPR certification, career prep panels, and technical sessions—to ensure students could gain both practical knowledge and career confidence.

One of our proudest accomplishments was laying the foundation for the inaugural BMES Conference, set to become a signature annual event. This conference will offer a platform for students to engage in dynamic learning experiences, participate in speaker sessions, and showcase their talents.

We also launched our very own Case Competition, providing students with a real-world challenge that tested innovation, problem-solving, and teamwork—skills critical in biomedical engineering. Through these initiatives, we created space for students to grow, explore, and feel more prepared for the paths ahead.

Wellness: Understanding the unique pressures BME students face, we launched the Rest & Reset wellness event. Through intentional programming, we aimed to create space for rest, connection with peers and mindfulness. It served as a reminder that productivity and well-being can—and should—coexist. Initiatives such as curated Care Packages during exam season, filled with comforting and supportive items, were small yet impactful gestures that reminded our peers they weren't alone.

To encourage balance and boost morale, we hosted our first-ever Movember Pub & Karaoke Night in collaboration with two other student groups to amplify wellness efforts, blending social wellness with purpose by supporting men's mental health awareness in a relaxed and welcoming space.

These efforts reflect our commitment to a more compassionate engineering culture—one where well-being is prioritized, conversations around mental health are normalized, and every student feels seen and supported.

FUTURE DIRECTION

Behind all these wins was a team of passionate leaders who truly believed in the value of building community, empowering future engineers, and leading with empathy.

As we pass the torch to the next team of BMES TMU leadership, we do so with a heart full of pride and hope. This year has been both transformative and grounding—for our chapter and for us personally. We've witnessed the incredible potential of our community, and we believe the future holds even more promise.

b. Leadership Expectations and Future Vision

Looking ahead, we envision BMES TMU continuing to grow as a vibrant hub for biomedical innovation, mentorship, and advocacy—a space where students feel supported, challenged, and empowered. To our incoming BMES Team, here are a few aspirations and guiding points we hope you carry forward:

- **Strengthen and Expand Signature Events:** Build on impactful initiatives like Alumni Night and the BMES Conference, and consider implementing formal mentorship pairings with alumni, graduate students, and faculty to support both academic and career growth.
- **Deepen Industry Engagement:** Continue fostering meaningful, reciprocal relationships with companies and organizations. Encourage their involvement in case competitions, workshops, and speaker events to help bridge the gap between industry and student learning.
- **Advance Wellness and Mental Health Advocacy:** Keep wellness at the heart of what you do. Continue hosting de-stressors and collaborate with equity-focused and health-centered student groups to bring inclusive and accessible wellness initiatives to life.
- **Expand Technical and Professional Development:** Support more skills workshops, design team collaborations, lab tours, and hands-on learning experiences. Celebrate student-led projects and encourage peer learning to build a culture of curiosity and innovation.
- **Foster Mentorship and Networking:** Strengthen opportunities for members to engage with graduate students, researchers, and BMES chapters across North America. Look into opportunities for international travel to National BMES Meetings, and always keep collaboration—on and off campus—at the forefront.

FUTURE DIRECTION

To the incoming leadership team;

Trust in your abilities and lean on one another for support as you continue to build with passion and purpose. The work you undertake is meaningful, and the impact you make will resonate long after your term. Lead with confidence and approach every interaction with respect. Celebrate the diversity within our chapter and strive to elevate every voice. Create a leadership culture that is inclusive, respectful, and equitable, where all students feel welcomed and supported on their journey.

With admiration and excitement for what's to come,

Afrahan Khan | Outgoing President (2024-2025)

Serena Udayakumar | Outgoing Vice-President (2024-2025)

Biomedical Engineering Society - Toronto Metropolitan University
